

Plymouth City Council: Building a lasting city partnership

For fifteen years, LDA Design has been working in partnership with Plymouth City Council, providing town planning and urban design advice on a site-specific and city-wide basis.

At a strategic level our work has included preparation of a city-wide design strategy, including for tall buildings, through to a ground-breaking study on creating sustainable neighbourhoods that provided important evidence to the Local Development Framework.

We have also developed a city-centre and waterfront vision and masterplan and prepared the masterplans and planning advice behind numerous Area Action Plans and Supplementary Planning Documents. Site-specific work includes the concepts and advice behind several successfully regenerated areas including Millbay Docks and East End Village.

Our partnership with the council proved highly effective, helping the council towards the RTPI's top planning award in 2005 for its innovative and leading-edge approach to the new planning system. LDA Design's key role was acknowledged in the citation for the award.
